

Flexible fuelling solutions for any construction project

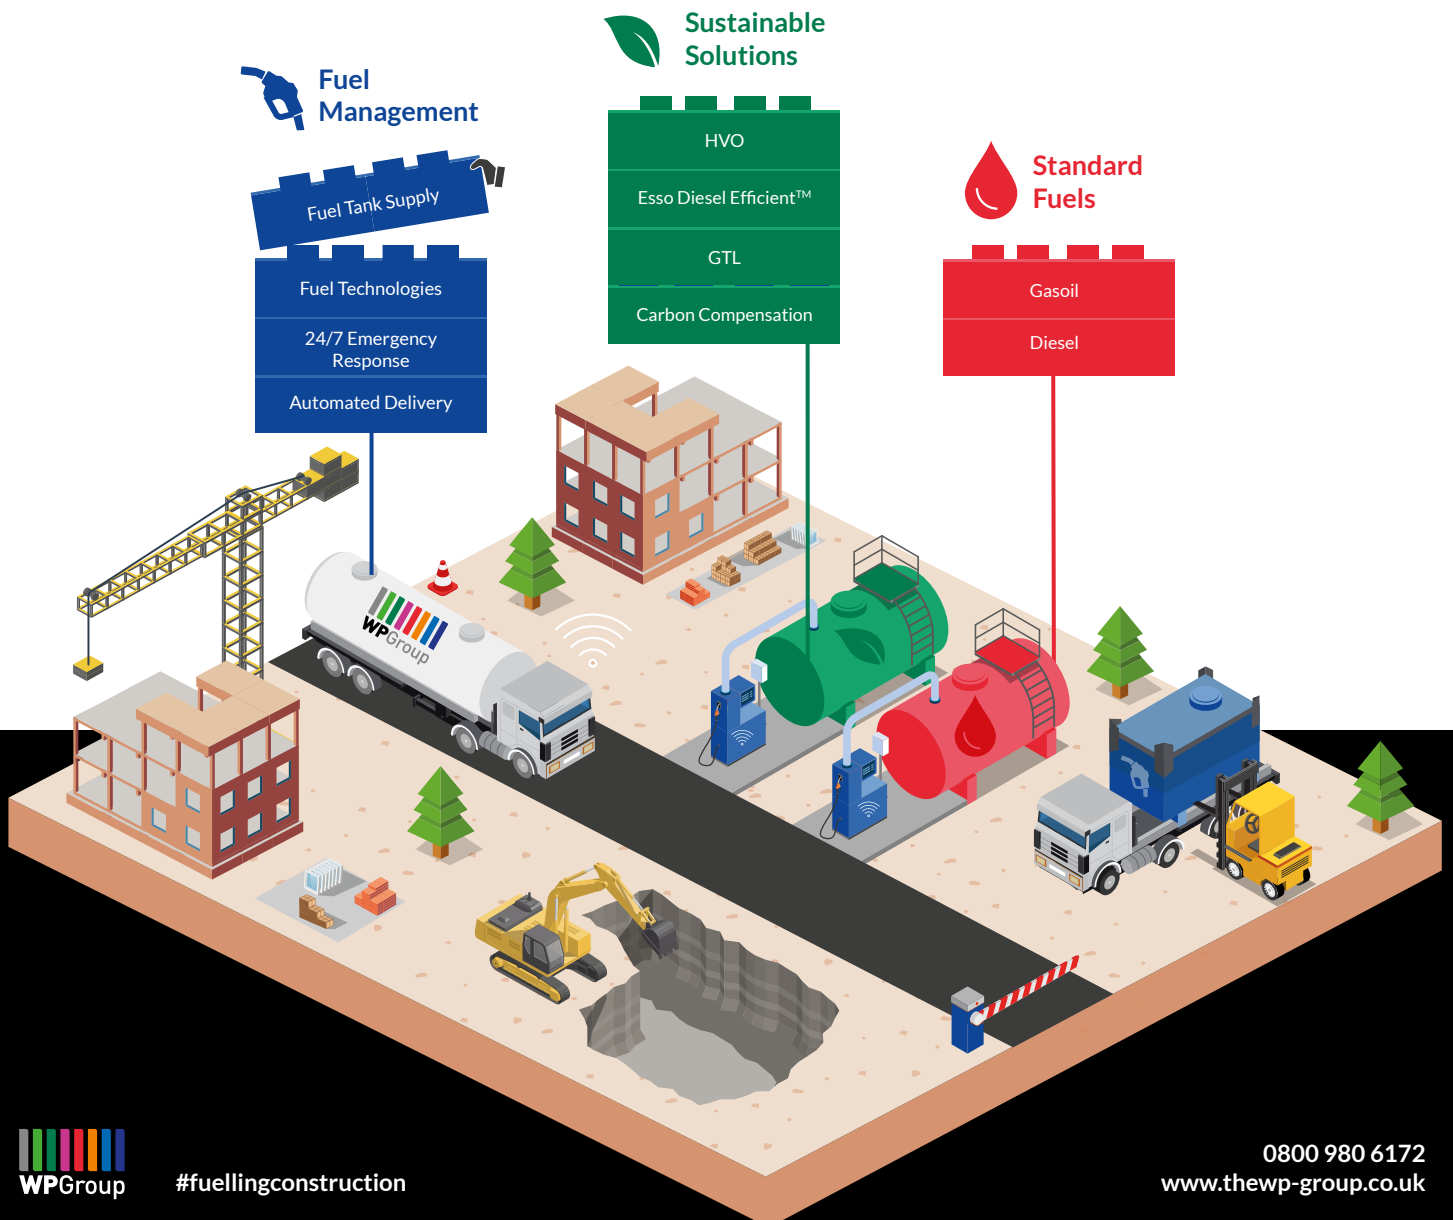

Start building your perfect fuels partnership

Our comprehensive range of fuelling solutions is tailored specifically for the construction industry and includes standard fuels, sustainable solutions and fuel management.

If all you need, to keep your site running effectively, is a service that provides regular and reliable deliveries of fuel, we've got you covered.

If your project has more complex requirements, and needs the very latest monitoring technology and sustainable solutions, we've got the perfect blend for you too.

So, whether you're building roads, houses or offices - fuel your projects with our flexible solutions tailored just for you.

The quest for ever-increasing levels of sustainability and efficiency is driving change and shaping the world around us.

With our range of sustainable fuel solutions, it's never been easier to minimise your project's carbon footprint. From 100% renewable fuel to carbon compensation, we provide flexible solutions to support you achieve your sustainability objectives.

HVO

Hydrotreated Vegetable Oil (HVO) minimises your carbon footprint and improves air quality as a 100% renewable drop-in diesel replacement.

Esso Diesel Efficient™

The Esso Diesel Efficient™ fuel delivers both a cleaner engine and lower emissions, contributing to an impressive overall performance for your engine and your business.

GTL

GTL (Gas-to-Liquid) Fuel has improved combustion properties inside standard diesel engines, due to the higher number of consistent and uniform molecules that are generated in its manufacturing process.

Carbon Compensation

Designed to support a journey to a low carbon future, we provide our customers with a simple and practical solution through our carbon compensation products.

Our portfolio of standard fuel products ensures our construction customers have access to the highest quality fuels, reliably delivered when and where it's needed.

Red Diesel

Red Diesel is a low-tax fuel that is most commonly used in construction. Our 24/7 delivery service ensures that our customers' sites and schemes, across the UK, are reliably and regularly supplied with this economical fuel option at the most convenient time for their operation.

Road Diesel

Road Diesel, also known as White Diesel and DERV (Diesel-Engine Road Vehicle), is one of a range of high-quality fuels we deliver across the UK to the construction sector. We have the expertise of running a fleet of over 50 tankers ourselves, so we understand the challenges that our construction customers face on a daily basis.

We'll work in partnership with you to help you manage your site's fuel use intelligently and efficiently with our comprehensive range of fuel management solutions.

Fuel Technologies

The utilisation of our comprehensive fuel management system enables our customers to track every transaction on their site, own use or subcontractor, and to pre-approve and authorise any vehicles/equipment that require the use of their fuel facilities.

Fuel Tank Supply

We'll ensure your site has access to a fuel supply 24/7, by not just supplying the fuel you need directly into your vehicles, but we can also supply the fuel tank for you to keep on site too. We offer a range of sizes to suit the requirements of your scheme.

24/7 Emergency Response

We offer Emergency 24/7 Fuel Response (response within 6/8/12 hours) to ensure we are always there for our customers and that there is always fuel in your tank.

Automated Delivery

Our system allows total automation from fuel delivery through to invoice management. Recording each individual transaction resulting in no manual intervention being required to record delivered volumes to each vehicle. This allows our customers to focus on business-critical tasks and eliminate any downtime linked to fuel delivery accuracy and accountability.

Take control of your fuelling

Understanding what it takes to keep your operation moving has driven our dedicated construction team to create a flexible suite of solutions designed specifically for you.

You can now combine solutions and services with complete flexible control. Fuel your projects, schemes and operation with WP Group's tailored solutions for construction.

Get in touch with us today and start building your perfect fuels partnership.
